## AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE:

**Please amend the Abstract as the follows:**

An automatic machine which, upon selection of a normal transaction, executes a normal transaction process with a normal transaction-use host based upon a processing state table (A state, etc.), is provided with a WEB transaction-use processing state table (w state) for stipulating the WEB transaction through the WWW, and a WEB transaction control section which, upon selection of the WEB transaction, executes a WEB transaction process with a predetermined WEB server based upon the WEB transaction-use processing state table. Thus, it is possible to execute not only normal transactions, but also ~~the~~ a WEB transaction which deals with new trading while updating information on demand.

# ABSTRACT OF THE DISCLOSURE

An automatic machine which, upon selection of a normal transaction, executes a normal transaction process with a normal transaction-use host based upon a processing state table (A state, etc.), is provided with a WEB transaction-use processing state table (w state) for stipulating the WEB transaction through the WWW, and a WEB transaction control section which, upon selection of the WEB transaction, executes a WEB transaction process with a predetermined WEB server based upon the WEB transaction-use processing state table. Thus, it is possible to execute not only normal transactions, but also a WEB transaction which deals with new trading while updating information on demand.
